Take control of your workflow and your time

Next-generation workflow solution with AI-powered speech recognition

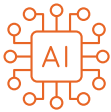

More efficiency, less paperwork

Are your clinical teams feeling overwhelmed by the mountain of paperwork? Is it leaving them with little focus time for patients? Documenting patient data can be a time-consuming and intricate process. Let **SpeechReport** support you to streamline your processes and increase productivity.

Tailor-made for busy healthcare professionals, **SpeechReport** is a modular system that effortlessly lightens workload. This innovative solution boosts a fully automated and flexible workflow, powered by cutting-edge AI-powered digital speech technology. Say goodbye to the hassles of document creation, management, and authorisation – all within a highly customisable system. Enhance your efficiency even further by integrating our user-friendly mobile app, structured reporting, and reporting tools.

SpeechReport will not only streamline processes but will also enable teams to reclaim valuable time in the workday for your patients and other more pressing tasks.

AI-powered speech recognition for enhanced flexibility and precision

Developed in collaboration with various healthcare institutions in the UK and Ireland, SpeechReport is based on the genuine needs and challenges within the medical sector, enabling both dictation through speech recognition and digital input. Further enhance your efficiency and convenience by integrating, structured reporting, reporting tool and our mobile app with automatic synchronisation.

SpeechCursor is powered by Atlas, our innovative speech recognition platform with Voice AI, based on Neural Networks and Deep Learning technologies. The platform is fast and seamlessly accommodates specialised medical terms and dialects, ensuring optimal recognition without the need for training. Atlas easily adjusts to your voice and accent, minimising disruptions, and external influences.

Simplify your reporting process like never before with SpeechReport, ensuring accurate clinical correspondence and an enhanced level of patient care.

"

Complete solution

Fully automated workflow from dictation to final document archiving.

Ultimate flexibility

Customisable to users' personal preferences and needs.

Premium support

Seamless product integration and implementation backed by outstanding after-sales support.

Flexible workflow

SpeechReport automates the entire workflow process for document creation. Generate, edit, authorise, distribute and archive documents to various programmes, such as EMR/EPR, all within one platform. The workflows are adaptable and can be configured to suit any specialisation.

Document creation

Create reports in an instant. Choose the desired (medical) template and start dictating. The toolbar with various formatting functionalities allows further customisation of reports. Texts used frequently can be easily added with a simple voice command.

"SpeechReport is a fast electronic speech recognition system that improves the quality of patient care and experience, by the production of documents following patient episodes. It relieves the necessity for clinicians to spend hours on admin and frees up time for delivery of care to patients."

Jenny Barker, Project Manager for SpeechReport and Transfer of Care at Hull and East Yorkshire Hospitals NHS Trust

Structured reporting

Create reports quickly and easily with ready-made templates. These templates are managed internally by your organisation and can be customised to your preferences.

SpeechReport modules for even more convenience and efficiency

SpeechReport Mobile

Whether you're at the office, at home, or on the go, SpeechReport Mobile enables you to update your reports wherever you are, all within a single app. Dictate reports on the go and send them directly to your back office through your existing workflow. Review reports in your task list, make last-minute changes, authorise, and forward them to the next step in your workflow. SpeechReport Mobile seamlessly integrates with your workflow in SpeechReport, allowing you to effortlessly incorporate mobile work into your daily activities.

SpeechReport Analytics

Optimise patient care with insights into operational data. This tool reveals performance and identifies bottlenecks.

Integration

SpeechReport seamlessly integrates with various systems. Many healthcare institutions use electronic patient records (EPR/EHR) or PACS/RIS systems. Through HL7 integration, patient information is directly accessible.

Hosting on-premise

When installed within the hospital environment, your healthcare IT organisation manages the hosting and administration of the entire solution. This allows you to retain full control over the environment.

Cloud-based hosting

Using SpeechReport in the cloud leads to a significant reduction in the maintenance costs of your ICT environment. G2 Speech takes on the responsibility of maintaining the server environment and managing the SpeechReport platform, alleviating your organisation from these tasks and associated costs.
