Aida – powerful AI technology that truly understands clinicians

Providing impactful, conversational and people-centric AI speech solutions that deliver efficiencies for healthcare professionals with ease.

Aida is built specifically for medical specialists to enrich clinical reporting, improve communication, enhance accuracy, and boost patient care and engagement. Utilising Large Language Models (LLM), neural networks and deep learning technology, our AI innovations further automate medical documentation with unparalleled accuracy, speech and efficiency - empowering clinicians to focus on what matters most; patient care.

KEY FEATURES

Enhanced Documentation

Aida provides an AI Assistant, Text Optimiser and Summarisation features at the click of a button to create quicker and more accurate documents.

Multi-Language Translation

Translation of medical transcriptions to create inclusive and accurate medical documentation at speed without the need for a translator.

Data Privacy and Security

ISO and GDPR regulations are adhered to by using robust encryption methods to safeguard patient data.

- Improve medical documentation accuracy
- Refine communication enabling natural conversations and seamless documentation
- Relieve cognitive load and admin burden
- Release time and boost efficiency
- Focus on what matters most; patients

SpeechCursor

SpeechCursor Aida is available within our **SpeechCursor** solution. **SpeechCursor** enables healthcare professionals to dictate into any application with unparalleled accuracy utilising Voice AI.

As a cloud-based solution, **SpeechCursor** is readily available anywhere and at any time - eliminating the need for infrastructure and application management investments.

Key features of SpeechCursor:

As a cloud-based product, **SpeechCursor** is suitable for small installations from just a few workstations to large scale, full organisational rollouts.

- Flexible dictation
- Cloud-based
- User profile ownership

Redefine patient care and engagement with Aida - built on almost 30 years of digital health knowledge, experience and expertise.

Quick and flexible

Quick, flexible and simple to use.

Low investment

Aida can work in busy and loud medical environments.

Premium support

Seamless product integration and implementation backed by outstanding after-sales support.

In Development:

Ambient Speech will provide added value with the ability to record and summarise conversations between multiple people. Automated Speaker Labelling will also quickly identify and tag different speakers in a transcription (e.g. consultant/patient clinics and multi-disciplinary team meetings). use our software to automate their reporting processes.
